## PROFESSIONAL SUMMARY

Passionate and detail oriented Full Stack Developer with expertise in Python, Django, React, and blockchain technologies. Proven ability to design and develop innovative web applications, with a strong foundation in APIs, PostgreSQL, and Ethereum smart contracts.

## TECHNICAL SKILLS

· Python, Django, PostgreSQL, APIs

· JavaScript, HTML, CSS, React

· Solidity, Ethereum, Git, Bootstrap

· Networking, CompTIA A+, Security+ (in progress)

## EXPERIENCE

· Gained practical experience in software development and blockchain technology through projects and contributions at Zone01 Kisumu and Web3wayAfrica.

## PROJECTS

· **SocialMedia** – Developed a social media platform with user authentication, post creation, and real time interactions using Django and React.

· **MovieApp** – Built a movie streaming application with dynamic content management and user reviews, utilizing Django, PostgreSQL, and JavaScript.

· **SimpleChatApp** – Created a real time chat application with WebSocket integration, using React and Django Channels.

· **Ecommerce Site** – Designed a fully functional e commerce platform with product listings, cart functionality, and payment integration using Django and Bootstrap.

· **Blockchain Certificate Verification** – Created a smart contract based certificate verification system for academic institutions using Solidity and Ethereum.

## EDUCATION

### Bachelor of Science in Software Engineering – KCA University (Expected 2025)

· Relevant coursework: Web Development, Networking, Cybersecurity, Blockchain.

· Self taught in web development and blockchain technology, with hands on experience through personal and collaborative projects.

# CERTIFICATIONS

· Bachelor of Science in Software Engineering (in progress)

· Software Engineering Bootcamp (in progress)

· Sui Blockchain Bootcamp (in progress)
